Remanufacturer Ivor Searle has added the 1.2-litre petrol engine for the Nissan Qashqai, Juke and Pulsar to its all-makes range of major units.

Covering over 90 percent of the UK's vehicle parc, Ivor Searle is constantly adding to its extensive programme of engines, gearboxes and turbos for cars and LCVs.

The newly-added four-cylinder direct injection turbocharged engine covers 100PS and 132PS versions of the Sunderland built Qashqai produced from 2014 and Juke models manufactured between 2014 and 2019, as well as the Pulsar assembled in Barcelona from 2014 to 2018.

Costing up to 40 percent less than OE, Ivor Searle engines are expertly remanufactured to exceed the BS AU257:2002 Code of Practice for remanufacturing engines.

All Ivor Searle engines are covered by a 12-month unlimited mileage parts and labour warranty. Customers are also offered free next-day UK mainland delivery for stock items ordered before 3.30pm.
