Ivor Searle adds 43 new turbo applications to range

Available off-the-shelf for free next-day delivery

Gavin Braithwaite-Smith • October 12, 2023 • Comments Closed • 0 likes

Remanufacturer Ivor Searle has added 43 new applications to its extensive range of turbos for cars and LCVs.

Quality remanufactured units for a number of BMW, Citroën and Mercedes models join the range, along with turbochargers for Mini, Peugeot and Vauxhall vehicles. Ivor Searle is constantly adding to its all-makes programme of engines, gearboxes and turbochargers which covers over 90 percent of the UK's car and LCV parc.

Costing up to 40 percent less than OE, the new turbo applications include the units for the 1.5-litre petrol engine found in BMW 1, 2, 3 and 4 Series models built from 2015.

For Citroën, Ivor Searle has added the turbo for the 1.2 petrol engine powering the C3, C4 and DS3, as well as DS4, Cactus and Berlingo models produced from 2014. Covering Citroën diesel applications, the remanufacturer has added the turbo for the 1.5 litre engine found in C4, C5, DS7 and Berlingo models built from 2017.

For Mercedes, Ivor Searle has added the unit for the 2.1-litre diesel engine for A, B, CLA and GLA Class vehicles produced from 2011.

Further additions include the unit for 1.5-litre petrol derivatives of Mini One, Cooper, Clubman and Countryman models built from 2015, as well as the turbo for 1.5 diesel Vauxhall Grandland X and Combo vehicles built from 2017.

For Peugeot, Ivor Searle has added the turbo for 1.2 petrol versions of the 208, 2008, 308 and 3008, as well as 5008 and Partner models produced from 2014. New Peugeot diesel applications include the unit for the 1.5-litre engine found in the 208, 2008, 308 and 3008, as well as 5008 and Rifter models built from 2017.

For peace of mind, all Ivor Searle turbochargers are covered by a two-year/unlimited mileage, parts and labour warranty. Ivor Searle products are available off-the-shelf for free next-day delivery on stocked items.

Alongside a dedicated sales and customer service team, the [website](#) features a unique VRN look-up facility, as well as search by vehicle make, model or engine code.
