### Ivor Searle adds to remanufactured turbo range with BMW N47 option

Affordable and reliable turbo upgrade for popular BMW diesel models

Adam Tudor-Lane November 25, 2024 Comments Closed 0 likes

Ivor Searle has bolstered its extensive range with a unit specifically designed for BMW N47 four-cylinder diesel engines.

This addition caters to a significant portion of British vehicles, as the N47 powers a sizeable chunk of the UK's car and light commercial vehicle (LCV) market.

The new turbocharger offers a cost-effective solution for BMW 1 Series and 3 Series models equipped with the 2.0-litre common rail diesel engine produced from 2007 onwards. Drivers can expect significant savings compared to purchasing a brand-new original equipment (OE) unit, with Ivor Searle's offering potentially costing up to 40% less.

For added peace of mind, Ivor Searle backs its remanufactured turbochargers with a comprehensive two-year warranty covering unlimited mileage, parts, and labour. They also provide speedy delivery within the UK mainland, getting replacement parts to customers the next day for orders placed before 3:30 pm.

Those seeking more information can contact the Ivor Searle sales team directly at 01353 720531 or visit their website [by clicking here](#).
