Ivor Searle adds BMW 2.0 diesel turbocharger to remanufactured range

New BMW application covers 1, 2, 3 and 5 Series models built from 2010 - 2016

Ivor Searle has added a turbocharger for the 2.0 litre derivative of BMW's popular N47 diesel engine to its all-makes programme which covers petrol and diesel cars and light commercial vehicles.

The new BMW application covers 1, 2, 3 and 5 Series models built from 2010 – 2016, as well as the X1 SUV.

Costing up to 40 per cent less than OE, Ivor Searle remanufactured turbochargers provide independent garages with competitive advantage without compromising on quality, warranty protection or customer service.

An Ivor Searle spokesperson said: "All Ivor Searle turbochargers undergo stringent quality checks and test procedures throughout the remanufacturing process to ensure maximum durability and service life.

"Prior to final assembly, the turbocharger's rotating assembly is balanced on state-of-the-art VSR equipment to OE specification, while oil flow rates are checked at the same time.

"Every turbocharger receives a detailed final inspection and is flow tested to ensure optimum performance."

Ivor Searle turbochargers are provided with a transferable two-year unlimited mileage parts and labour warranty.

All units are also supplied pre-installation guidelines, as well as model-specific instructions if required.

Ivor Searle holds a comprehensive stock of turbochargers and provides free next day UK mainland delivery for stock items ordered before 3.30pm.
