automotive distribution
outlets.

First full ecommerce website
with next day delivery.

European distribution.

Climate

Remanufacturing is the ultimate form of recycling, helping to conserve energy and raw materials as well as reducing pollution and land fill space. Research has shown that remanufacturing an engine can save 55kg of steel and 8.3kg of aluminium, along with reducing emissions of carbon dioxide by 565kg, carbon monoxide by 6.09kg and sulphur dioxide by 3.985kg.

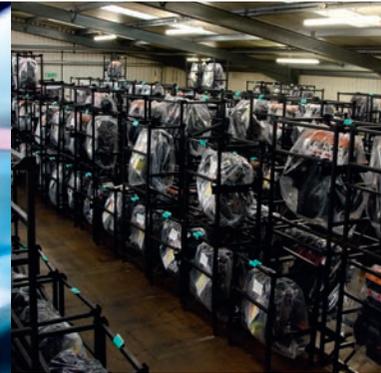

*Ming, Y. Ming, C. (2005) Life Cycle of Remanufactured Engines. School of Mechanical and Power Engineering, Shanghai Jitong University

Mission Statement

“Our mission is to produce products engineered to the highest standards, accompanied by exceptional services with a commitment to our customers and the environment.”

Quality

At Ivor Searle, we have a comprehensive quality management system in place which is certified to BS EN ISO 9001:2008. With continuous improvements backed up with a stringent quality team, a high level of quality is always at the forefront of our business. All issues are subject to thorough investigations before putting into practice on the shop floor.

The 8 principles of quality ensure our certification and our determination to lead the business through quality and excellence.

- 1 Customer focus
- 2 Leadership
- 3 Involvement of people
- 4 Process approach
- 5 System approach to management
- 6 Continual improvement
- 7 Factual approach to decision making
- 8 Mutually beneficial supplier relationships

ISO 9001

Coverage

Our products and services cater for all makes and model of car and light commercial vehicles from classic to present day vehicles. We provide an off-the-shelf service for next day delivery.

Commitment

Our highly trained staff will handle your enquiry quickly and efficiently, ensuring your vehicle is back on the road as soon as possible. Add to this exceptional aftersales and a 12-month unlimited mileage warranty on remanufactured products or 2-years on remanufactured turbochargers, we take customer care seriously.

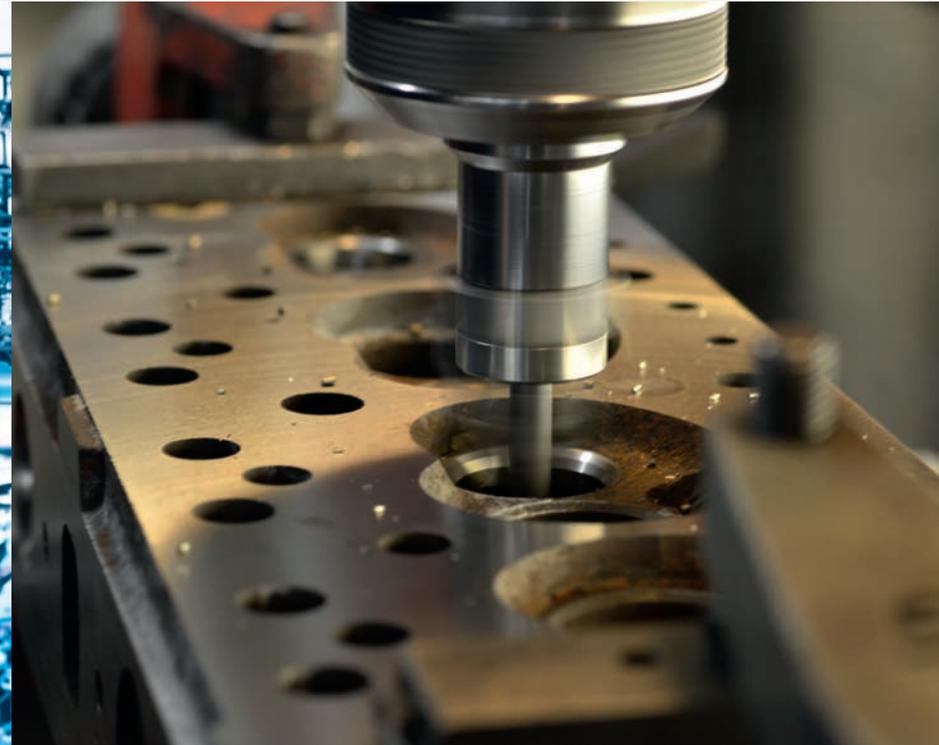

Peace of Mind

- Ivor Searle have weekly quality review meetings to assess quality of all products and processes for continuous improvements
- All Ivor Searle remanufactured engines are tested prior to dispatch
- 12-months unlimited mileage (parts and labour) national guarantee on all manufactured products and 2-years on remanufactured turbos
- Ivor Searle remanufactured products are built to the following codes of practice: BS AU 257:2002 (Engines) and ISO9001
- Reduced supply chain (dealing direct with manufacturer)

What is Remanufacturing?

- An Ivor Searle remanufactured engine is a used engine that has been returned to a 'good as new' state in accordance with the manufacturer's original specification, with fits and clearances to provide similar performance, reliability and longevity comparable to that of a new engine.
- Ivor Searle remanufactured engines should not be confused with 'reconditioned', 'exchanged', 'rebuilt', 'repaired or 'replacement' engines which are not subjected to the same level of remanufacturing, major replacement of parts or restoration of all fits and clearances.
- Ivor Searle remanufactured products provide an environmentally friendly solution to replacing major units without compromising quality.

Our Production Facility

Products - Engines

Remanufactured Engines

- Engines supplied bare or with injection equipment (not fitted)
