Ivor Searle offers remanufactured PSA 1.2L engine

High-quality, cost-effective solution for Peugeot, Citroën, and Vauxhall vehicles

Adam Tudor-Lane | September 30, 2024 | Comments Closed | 0 likes

Ivor Searle has increased its already comprehensive range to include the popular PSA 1.2 litre VTi petrol engine. This engine is found in a wide variety of Peugeot, Citroën and Vauxhall vehicles, making it a valuable addition to their stock.

The remanufactured 1.2L engine caters to a large segment of the UK car market, covering models produced between 2012 and 2018. This includes the Peugeot 208, 301, 308 and 2008 SUV, the Citroën C3, C4 and DS3, and the Vauxhall Crossland SUV.

At a potential saving of up to 40% compared to the original equipment (OE) price, Ivor Searle's remanufactured engines offer a cost-effective solution for car repairs. These engines are meticulously restored to meet or exceed industry standards (BS AU257:2002) and come with a comprehensive 12-month warranty for parts and labour. Ivor Searle also provides free next-day UK mainland delivery for orders placed before 3:30pm.

For more information on engine compatibility and to explore the full range of remanufactured parts, visit the Ivor Searle website or contact their sales team.
